

Clarification No. 1

S/No	Request	Response
	First Batch	
1	Have you purchased core switches and PoE switches used by Wi-Fi.	Yes
2	Is the NMS (Network Management System) is required to manage the 130 Wi-Fi access point. It is recommended that the NMS be used to restrict the access.	The specification is in the bidding document, if you think NMS is needed, add to the submission
3	What kind of the optical modules are installed on the original Cisco core switches?	10G Optical Modules
4	If two switches are ordered, do you want to use the stacking technology to enhance stability?	Yes
5	Is 10GE-T required by you because RJ45 is usually GE. Can GE meet the requirement?	The core switch has both 10G SFP and RJ45 modules in it
6	Does your PoE switch support PoE+?	Yes
